PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience developing web and mobile applications using Kotlin, React.js, Next.js, Firebase, and MySQL. Experienced in implementing authentication, database integration, location-based features, application workflows, and software engineering practices. Seeking an entry-level Application Developer role where I can apply my programming skills and contribute to enterprise software development.

TECHNICAL SKILLS

Programming & Web: Java, Kotlin, Python, JavaScript, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Vite, Tailwind CSS

Mobile: Android Development

Databases: Firebase / Cloud Firestore, MySQL

Development: REST APIs, Authentication, Role-Based Access Control, UML/System Modeling

Tools: Git, GitHub, VS Code, XAMPP

Deployment & Hosting: Vercel

RELEVANT PROJECT EXPERIENCE

LUWAS – Local Government Unit Unified Web-Based Alert System

Full-Stack Developer | Real-World Client Project

- Designed and developed a responsive web-based information system for managing local government data, users, households, incidents, hazards, and emergency-related information.
- Implemented secure authentication and role-based access control using Firebase Authentication and Firestore.
- Developed interactive dashboards, data management modules, reporting features, and analytics to support information monitoring and decision-making.
- Integrated Leaflet and Turf for interactive mapping and geospatial visualization and analysis.
- Built reusable and responsive interfaces using Next.js, React.js, and Tailwind CSS.
- Designed Firestore data structures and application logic to support efficient database-driven operations.

AcciAlert – Real-Time Accident Detection and Emergency Response

Android Application Developer | Academic Project

- Developed an Android-based accident detection and emergency response application using smartphone accelerometer and gyroscope data.
- Implemented an accident confirmation workflow and automated emergency notification process for unconfirmed incidents.
- Integrated Firebase Authentication for user registration, login, email verification, and password recovery.
- Developed emergency contact management, GPS/location functionality, interactive maps, accident history, and user profile features.

- Applied software engineering and UML-based system modeling, including use case, class, sequence, and activity diagrams.

EDUCATION

Bachelor of Science in Computer Science

Bohol Island State University – Clarin Campus

2022 – 2026

Relevant Coursework: Software Development, Database Management, Systems Analysis & Design, Computer Networking
